Benefits of Ownership

Purchasing a brand new building from a trusted developer minimizes the risk to significant capital repairs and replacements over the first 15 years of ownership. Whether you purchase real estate to grow your business or as an investment, controlling your real estate allows for excellent maintenance of your real estate asset and carefree ownership for the operating business.

PERSONAL WEALTH

Build personal wealth apart from your operating company.

FLEXIBILITY

Control of your own facility and be free of Landlord woes. Be your own landlord by controlling your rent increases.

EQUITY

Build your own equity instead of investing in leasehold improvements to appreciate someone else's asset.

TWO-FOLD TAX BENEFIT

Owner's business will still write off their rental payment as a business expense and their holding company will deduct carrying costs against rental income. Potential for Capital Cost Allowance deduction.

Owning your company's real estate provides flexible exit strategies for business owners.

1
Selling your business & retaining an income producing real estate asset.

2
Selling your facility (and potentially leasing back the facility) for a substantial cash infusion.

3
Selling both your business & the facility together.
